(54) FILTER FOR INFLATOR OF AIR BAG DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a filter for an inflator of an air bag device which is simple in manufacture, strong in strength, and low in manufacturing cost.

SOLUTION: The filter 1 is formed in such a constitution that an expand metal being its material is lap-wound in a cylindrical state, a number of layers and in a spiral state, and by spot-welding together the expand metals of an innermost peripheral part and an outermost part, the wound expand metal is not separated away from each other, and the shape of the cylindrical filter is kept.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
